

Part II - Speedup of combined method over -O3 baseline

Part II - Combined optimisation vs individual methods

Task 1.2 - Baseline matrix multiply: FLOPS vs matrix size

Task 1.3 - Compiler optimisation: FLOPS vs matrix size

Task 1.4 - Loop unrolling: FLOPS vs matrix size

Task 1.5 - Multicore: FLOPS vs matrix size for varying thread counts

Task 1.6 - Blocking: FLOPS vs matrix size for varying block sizes

Task 1.7 - SIMD: baseline vs AVX2 subword parallelism
